

ASSEMBLY | RELOCATION | DISASSEMBLY
OF ALL TYPES OF STORAGE SYSTEMS

THE TEAM

Our company rely on highly qualified technicians and installers with many years of experience for the overall maintenance of all company projects. This special department is prepared for quick and professional installation of all types of storage systems, which ensure the safety of the storage workers and reduces the profit loss from improper operation.

STAMH assume responsibility for replacement and repair of defective parts after every storage system supply and installation in accordance with terms of warranty. A special team is responsible for adequate intervention in emergencies and cares for the smooth functioning of the installed systems. This allows our clients to recover their daily activities in the warehouse without any losses.

Installation group structure:

- Project manager
- Geodesist
- Welder
- Motocar driver
- Lift machines operators
- Fitters
- Fitters for high attitude objects- all passed special courses
