

STAMH®

IDEA 5 STORAGE SYSTEMS

General Features

Idea 5 is a storage system for manual picking based on the “man to product” principle, designed for lighter goods. The longspan shelving is designed for warehouses where storage units can be extended to greater lengths. This system also makes optimal use of the warehouse height, as the higher levels can be accessed mechanically by devices that lift the operator to the required height. The Idea 5 storage system can be combined with Gangway and Mezzanine solutions;

Advantages

- Optimal storage system for manual picking;
- Adjustable loading levels;
- Bolt free all steel shelving system;
- Bright and modern look and feel;
- No need of nuts, bolts or clips;
- Easy to assemble and erect;
- Stability and east access by all sides of the shelves;
- Wide range of sizes – just request a solution;
