

KARDEX REMSTAR SHUTTLE XP

SAVE SPACE AND INCREASE PRODUCTIVITY

SHUTTLE XP modules provide flexible solutions for high storage density, optimization of storage space and drastic increase in productivity with retrieval speed of up to 0.7 m/sec.

FAST ACCESS TO A LARGE NUMBER OF STORED GOODS

- With guaranteed picking accuracy, up to 99.9%;
- Suitable for spare parts, electronic components and much more;
- Security of the stored items, thanks to the controlled access to the system;
- Modular constructions and extensions;
- Faster access to each item - up to 67 % increased productivity;
- Save over 85% of your storage area, thanks to the vertical storage capacity;

TECHNICAL SPECIFICATIONS AND ADVANTAGES

MAXIMUM USAGE OF THE STORAGE HEIGHT

Storage height from
2.55 to 30.05 meters;

Optimal storage density;

Containers, adaptable to
the stored items;

Vertical speed of each
tray: up to 2 m/s.

"Goods to person principal", increasing
productivity;

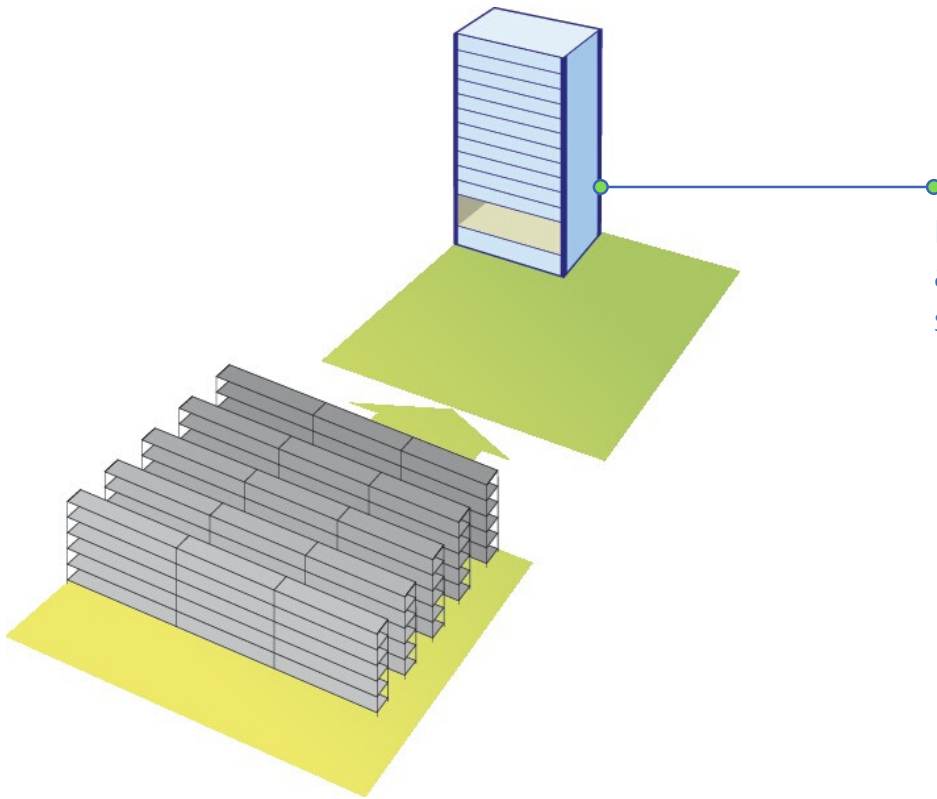

Over 700 kg. load on each Shuttle XP 700 tray;

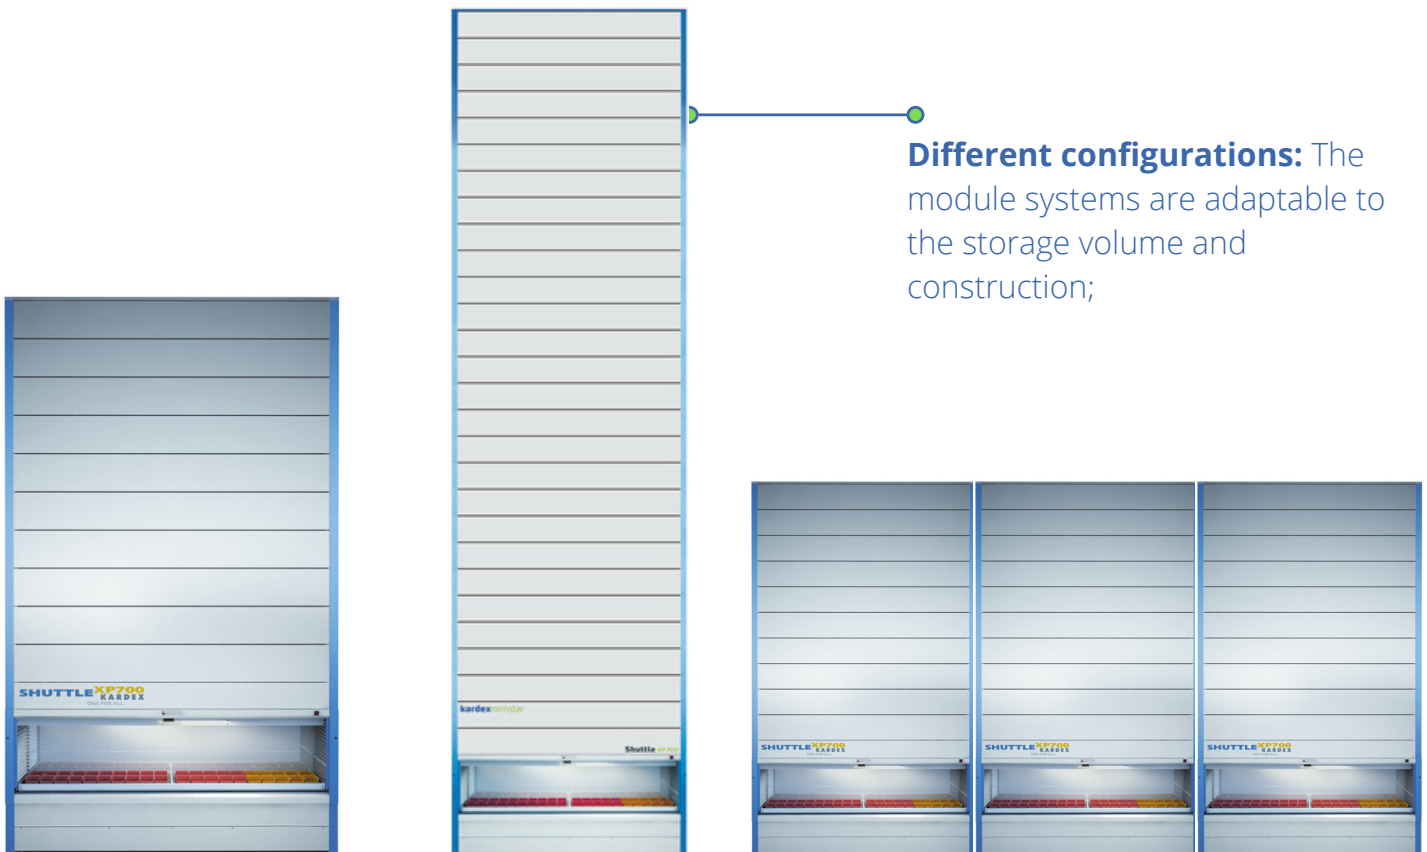

Refrigerated storage possibility - 20 °C ± 5K;

CONFIGURATIONS

SHUTTLE XP OPTIMIZES THE STORAGE SPACE

More goods in a **smaller storage area**, compared to other storage systems;

Different configurations: The module systems are adaptable to the storage volume and construction;
