20 STAMH[®] years

STAMH[®] is an engineering company that performs consulting, design and engineering of complex automation and mechanized warehouses, including management software. The territory in which it operates and has its own companies and representative offices is in Bulgaria, Greece, Macedonia, Romania and Serbia and Russia.

Our main products are:

- Ÿ Different type of Automated Storage systems for boxes and for pallets including racks, stacker cranes, conveyers and Management system.
- Ÿ Vertical Automated Storage and Retrieval system for

- office and industrial applications
- Ÿ Dynamic roll systems for pallets and boxes, all kinds of roll and belt conveyers and automated sorter systems
- Ÿ Mobile racking systems for pallets and long material
- Ÿ Palletizers and robocars
- Ÿ Warehouse management software WMS
- Ÿ Lifting equipment
- Ÿ Professional cleaning machines

MEZZANINE

- ϕ Multiplies surface space in industrial premises
- ϕ Adaptable to any specific needs thanks to the great variety of sizes available, types of floors, construction systems etc.
- ϕ Quick and easy to assemble
- ϕ They can be combined with any racking or shelving system

Mezzanines are steel structures made out of main beams, secondary beams and columns. They create new elevated surfaces on warehouse or premises floors, enabling extra space for storage, work areas, offices, etc. in a quick and inexpensive way. Considering that land is an increasingly rare and expensive commodity, especially in urban areas, mezzanines offer a cost-effective and highly versatile solution for companies that need to increase their storage surface area without affecting their bottom line, or when it is not possible to expand warehouse due to the nature of space. Installing a mezzanine doubles or triples storage surface area. It is the best way to solve space problems at a minimal cost. Mezzanine floors are totally dismantlable. That means that all elements are recoverable and their structure, dimensions and location can be easily modified.
